

Avery[®] Frequently Asked Questions

Cards Information

Q1. Can I print on both sides of my cards?

The products that are marked double sided on the packaging can be printed on both sides. Delegate cards (product code 947000) can also be printed on both sides of each fold.

Q2. Can I print to the edge on Avery Business Cards?

If you would like to print an entire image on your business cards, we suggest you use the following products: 936220 (software code C32015), 936221 (software code C32028), 936223 (software code C32096), 936224 (software code C32097) or 936229 (software code C32028). These products feature 8 cards per page without any of the cards touching each other. This allows you to use the entire card for full bleed printing. Our other business cards are made with 10 per page, with each card touching the card surrounding it. This doesn't allow for print to the edge capability.

Q3. Can I print a laser printer product with an inkjet printer?

If the product package is labelled "Laser/Inkjet", the product can be printed through either inkjet or laser printers. Double sided colour laser card products (product codes 936227, 959079, 936230) can be single side printed through an inkjet printer.
