

**To get started with sizing up your labels:
Print and cut out this handy
flexible ruler**

**Step
01**

› **PRINT**

Print this page at original size or 100% full scale. Do not fit under 100%, reduce or scale. For best results, we recommend printing with Adobe Acrobat Reader.

**Step
02**

› **CUT OUT**

Use scissors to cut out the ruler along the dotted lines.

**Step
03**

› **MEASURE**

Use this ruler to measure the area to be covered. Remember to start your measurement from 0 millimetres! It can be helpful to tape the ruler to prevent it from slipping during the measurement. For wrap-around labels, we recommend that you allow for an additional overlap of 2 mm.

**Step
04**

› **ORDER**

When you have found the right size, go to www.averyproducts.com.au/weprint to design and order your new labels. Since most printers introduce some level of distortion, it's possible your ruler may not print to exact size. Please note Avery is not responsible for any sizing errors based on measurements made with this ruler.
