

Avery WePrint Printable Label Size Chart: Print, cut out, and find your label size

Step 01 › **PRINT**
Print this page at the original size or 100% full scale. Do not fit under 100%, reduce or scale.
For best results, we recommend printing with Adobe Acrobat Reader.

Step 02 › **CUT OUT**
Use scissors to cut out the required label shapes along the dotted lines.

Step 03 › **TRY OUT**
Place or stick the label shapes individually on your product to visualise which label fits best.

Step 04 › **ORDER**
When you have found the right size, go to www.averyproducts.com.au/weprint to design and order your new labels. Since most printers introduce some level of distortion, it's possible this guide may not print to exact size. Please note Avery is not responsible for any sizing errors made as a result of the use of this document.
